

Find The High-Tech Closet at Dream Closets

We're living in a high-tech world: if our refrigerators can tell us what groceries to buy, why can't our closets tell us where to find that favorite black cocktail dress? But they can, says Malia Gurney from **Dream Closets!** However, most home closets remain in the Dark Ages, with one shelf and pole at eye level and absolutely nothing in common with the items that need to be stored in the closet.

"I'm often amazed how homes in Hawaii can sell for more than \$300,000, yet little or no effort is made in providing the home owner a well organized closet. In Hawaii, this is very important since space is a premium," explains Malia. Closets, pantries and home office storage have gone high-tech, with hanging rods, shelves, built-in mirrors, drawers, baskets and surface space custom-designed to match your exact needs of the home owner. Every inch of your storage real estate is valuable and expert closet organizers like Malia will design

Closets, pantries and home office storage have all gone high-tech.

custom cabinetry to dovetail perfectly with your unique space. The process is simple and starts with a phone call to Malia at Dream Closets. She will first review all your current possessions. Next, she will design an array of shelves, poles, drawers, baskets and other accoutrements to ensure your new closet or garage cabinets will stay organized once they're installed.

"Our possessions move from hanger to use to cleaning and then back again," says Malia. "With an organized custom closet from Dream Closets, from the time the clean, folded clothes get stored, to the time your worn aloha shirt gets thrown in your new, built-in laundry basket, your possessions will have a specific place to go through the cycle of wearing, cleaning and storing." As the authorized ClosetMaid dealer for Hawaii Dream Closets can offer you an extensive line of products and solutions that meet your specific needs.
